

Polish is a Beacon Foundation initiative that value adds to existing preparatory work in guiding young people with career pathways by providing personal presentation, representation and communication training. These skills aim to give young people the ability to prepare and conduct themselves when entering the world of work and throughout their employment. Business people and education professionals alike have expressed a need to give students a greater understanding of these essential life skills.

Beacon recognises that young people need to be given the 'edge' when entering the harsh realities of the world of work. In order to provide young people with the necessary skills to compete in a competitive market they must be given advice and assistance that will guide them and give them the confidence to put their best foot forward.

Polish has been designed to address issues such as personal confidence, self-respect, presentation and communication that are often issues that are difficult to present in a traditional school setting. It is therefore vital that specialists in this field are engaged to offer thorough training and support in this area.

Polish is a one-day, dynamic, highly interactive program presented by exciting young professionals that have a personal passion for the future of our young people. Students leave the program with a greater understanding of the expectations of employers and the real world, greater self esteem and a standard of presentation the ensures young people are given the opportunities they deserve.

Application Form

Course Details
